

LOVE PLANET 69

one: I don't know if I lie awake
Or if it's just a dream
Your spacy ship attracts me
With a cosmic silver beam

Some whirring sound now splits the night
The dazzling beam draws me inside

We're leaving ground
Travelling much faster
Than the hyperspeed speed of light
Your fiery lips seduce me
Into enjoying this flight

bridge: Fly on and dance
Be my romance
Just take your chance
For a higher suspense

chorus: Let's fly
To Love Planet 69
Let's fly
Weightless all along the line
Let's fly
We flirt on Love Planet 69
Where two hearts beat in double time

two: Your purring voice is gently whispering
Welcome darling, just relax
We're heading for a special trip
Have spacy love and cosmic sex

You kiss me as we're passing Mars
Get undressed amongst the stars
Flirtatious motions feel so vast
In supersonic astro-love

[bridge & chorus]

three: So if you see a silver beam
Make your wish upon a star
Pack your bag, she'll pick you up
Nonstop to Andromeda

[bridge & chorus to fade]
