

Man in our Moon

If we can make it to the moon
I'll have to make it back to you
There is a feeling in the air
Whispering me you should be there

Sometimes when I feel very blue
I think of good ole' times and you
My mind is far so far away
Left in the clouds of yesterday

Our common days too far away
My loneliness too near
I never thought, I'd miss you so
But I won't shed a tear

There is a man in our moon
Invisible this afternoon
And there is something in the air
Telling me that you still care

If I can make it back to you
It should be now or very soon
I wonder why some dreams come true
One-way and of the blue

I know sometimes our times were hard
But now it's hard to be apart
Cause I am born to reach the stars
Leaving the clouds of the past

Our common days are far away
My loneliness too near
I never thought, I'd miss you so
I must return, my dear

There is a man in our moon
Invisible this afternoon
And there is something in the air
Telling me you that you still care

There is a man in our moon
Reflecting on my coffee spoon
And there is something in the air
Telling me that you still care

Telling me... you're waiting... somewhere...
